#### 3 SIGNIFICANT ACCOUNTING POLICIES

#### a) Basis of Accounting

The financial statements of the Group and of the Company have been prepared under the historical cost convention, unless otherwise indicated in the respective accounting

FINANCIAL STATEMENTS for the period ended 30 April 2009 (continued)

#### b) Basis of Consolidation

The consolidated financial statements include the audited financial statements of the Company and of all its subsidiary companies made up to 30 April 2009. Subsidiary companies are those companies in which the Group owns, directly or indirectly, more than 50% of the equity share capital and has power to exercise control over the financial and operating policies so as to obtain benefits from their activities.

Subsidiary companies are consolidated from the date on which control is transferred to the Group and are no longer consolidated from the date when control ceases. Subsidiary companies are consolidated using the acquisition method of accounting.

Under the acquisition method of accounting, the results of subsidiary companies acquired or disposed of during the period/year are included from the effective date of acquisition or to the effective date of disposal, as applicable. At the date of acquisition, the fair values of the subsidiary companies' net assets are determined and these values are reflected in the consolidated financial statements.

Goodwill arising on acquisition is recognised as an asset and initially measured at cost, being the excess of the cost of the business combination over the Group's interest in the net fair value of the identifiable assets, liabilities and contingent liabilities recognised. If, after reassessment, the Group's interest in the net fair value of the acquiree's identifiable assets, liabilities and contingent liabilities exceeds the cost of the business combination, the excess (i.e. negative goodwill) is recognised immediately in the income statements.

Minority interests represent that portion of the profit or loss and net assets of a subsidiary company attributable to equity interest that are not owned, directly or indirectly through subsidiary company, by the parent. Minority interests are measured at the minorities' share of the fair values of the subsidiary company's identifiable assets and liabilities at the acquisition date and the minorities' share of changes in the subsidiary company's equity since that date.

All significant inter-company balances and transactions are eliminated on consolidation. Uniform accounting policies are adopted in the consolidated financial statements for like transactions and events in similar transactions.

## Revenue

Revenue of the Group represents the net invoiced value of services rendered and product sold, arising from the publication, printing and distribution of newspaper, periodicals, journals, magazines and books.

Revenue of the Company represents gross dividend incomes received and receivable from subsidiary companies.

Revenue from advertisement is recognised upon placement of the advertisement in the publication, whereas revenue from publication and subscription is recognised upon delivery of the publication to the vendors (less returns) and subscribers.

Event management income is recognised when the services are rendered.

Interest income is recognised as it accrues unless recoverability is in doubt.

Dividend income is accounted for when the right to receive dividend is established.

# d) Income Tax

Income tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the period/year, calculated using tax rates that have been enacted or substantively enacted at the balance sheet date. Current tax for current and prior periods is recognised as a liability (or asset) to the extent that it is unpaid (or recoverable).

Deferred tax is provided for, using the "liability" method, on temporary differences at the balance sheet date between the tax bases of assets and liabilities and their carrying amounts in the financial statements. In principle, deferred tax liabilities are recognised for all taxable temporary differences and deferred tax assets are recognised for all deductible temporary differences, unused tax losses and unused tax credits to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences, unused tax losses and unused tax credits can be utilised. Deferred tax is not recognised if the temporary difference arises from goodwill or from the initial recognition of an asset or liability in a transaction which is not a business combination and at the time of the transaction, affects neither the accounting profit nor taxable profit.

The carrying amount of the deferred tax assets, if any, is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient future taxable profit will be available to allow all or part of the asset to be recovered.

Deferred tax is measured at the tax rates that are expected to apply in the period/year when the asset is realised or the liability settled, based on tax rates that have been enacted or substantively enacted at the balance sheet date. Deferred tax is recognised in the income statements, except when it arises from a transaction which is recognised directly in equity, in which case the deferred tax is also charged or credited directly in equity, or when it arises from a business combination that is an acquisition, in which case the deferred tax is included in the resulting goodwill.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Group intends to settle its current tax assets and liabilities on a net basis.

#### 3 SIGNIFICANT ACCOUNTING POLICIES (CONTD.)

#### e) Foreign Currency Conversion

#### i) Functional and presentation currency

The individual financial statements of each entity in the Group are measured using the currency of the primary economic environment in which the entity operates ("the functional currency"). The consolidated financial statements are presented in RM, which is also the Company's functional currency.

#### ii) Foreign currency transactions

Transactions in foreign currencies are converted into Ringgit Malaysia at the approximate exchange rates prevailing at the transaction dates or, where settlement has not yet been made at the end of the financial year, at the approximate exchange rates prevailing at that date. All foreign exchange gains and losses are taken up in the income statements.

## f) Employee Benefits

Wages, salaries, paid annual leave, bonuses and non-monetary benefits are accrued in the period/year in which the associated services are rendered by employees of the Group and the Company.

The Group and the Company make statutory contributions to an approved provident fund and contributions are charged to the income statements. Once the contributions have been paid, the Group and the Company have no further payment obligations. The approved provident fund is a defined contribution plan.

#### g) Impairment of Assets

The carrying amounts of property, plant and equipment, publishing rights, investment in subsidiary companies, investment in an associated company and other investments are reviewed at each balance sheet date to determine whether there is any indication of impairment. If such an indication exists, the asset's recoverable amount is estimated. An impairment loss is recognised whenever the carrying amount of an asset or its cashgenerating unit exceeds its recoverable amount.

Recoverable amount is the higher of fair value less costs to sell and value-in-use. In assessing value-in-use, the estimated future cash flows are discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in the income statements

Where an impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in the income statements.

# h) Property, Plant and Equipment and Depreciation

Property, plant and equipment are stated at cost less accumulated depreciation and any impairment losses.

Depreciation of property, plant and equipment is computed on the straight-line method at the following annual rates based on the estimated useful lives of the various assets:

Plant and machinery	10% - 20%
Office, factory equipment and air-conditioning system	10% - 20%
Furniture, fittings and fixtures	10% - 25%
Computers	10%- 33%
Motor vehicles	20% - 25%
Renovations	20%

The estimated useful lives, residual values and depreciation method are reviewed at each period/year end, with the effect of any changes in estimates accounted for prospectively.

Gain or loss arising from the disposal of an asset is determined as the difference between the estimated net disposal proceeds and the carrying amount of the asset, and is recognised in the income statements.

# i) Publishing Rights

Publishing rights are stated at cost less impairment losses, if any.

# j) Leased Assets And Hire-Purchase Arrangements

Assets under leases which in substance transfer the risks and benefits of ownership of the assets are capitalised under property, plant and equipment. The assets and the corresponding lease obligations are recorded at the fair value of the leased assets which approximates the present value of the minimum lease payments, at the beginning of the respective lease terms.

Finance costs, which represent the difference between the total leasing commitments and the fair value of the assets acquired, are charged to the income statements over the term of the relevant lease period so as to give a constant periodic rate of charge on the remaining balance of the obligations for each accounting period. All other leases which do not meet such criteria are classified as operating leases and the related rentals are charged to the income statements as incurred.

# k) Investments

Investment in subsidiary companies, which is eliminated on consolidation, is stated at cost in the Company's financial statements less any impairment losses.

Other investments in quoted loan stocks are stated at the lower of cost and market value.

#### 3 SIGNIFICANT ACCOUNTING POLICIES (CONTD.)

#### k) Investments (contd.)

Market value is calculated by reference to stock exchange last done prices at the close of business at the balance sheet date.

Other investments in unquoted shares are stated at cost less any impairment losses.

#### I) Investment in an Associated Company

An associated company is an entity over which the Group has significant influence and that is neither a subsidiary nor an interest in a joint venture. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

The results and assets and liabilities of associated company are incorporated in the consolidated financial statements using the equity method of accounting based on the management accounts of the associated company. Under the equity method, investments in associated company are carried in the consolidated balance sheet at cost as adjusted for post-acquisition changes in the Group's share of the net assets of the associated company, less any impairment in the value of individual investments. Losses of an associated company in excess of the Group's interest in that associated company (which includes any long term interests that, in substance, form part of the Group's net investment in the associated company) are not recognised.

When a group entity transacts with an associated company of the Group, profit and loss are eliminated to the extent of the Group's interest in the relevant associated company.

#### m) Inventories

Inventories are valued at the lower of cost and net realisable value. Cost is determined on the weighted average method. The cost of trading merchandise and raw materials comprises the original purchase price plus cost incurred in bringing the inventories to their present location and condition. The cost of production materials comprises the cost of raw materials, direct labour and a proportion of production overheads. Net realisable value represents the estimated selling price in the ordinary course of business less selling and distribution costs and all other estimated costs to completion.

#### n) Receivables

Trade and other receivables are stated at nominal value as reduced by the appropriate allowances for estimated irrecoverable amounts. Allowance for doubtful debts is made based on estimates of possible losses which may arise from non-collection of certain receivable accounts.

#### o) Payables

Trade and other payables are stated at cost which approximate the fair value of the consideration to be paid in the future for goods and services received.

## p) Provisions

Provisions are made when the Group and the Company have a present legal or constructive obligation as a result of past events, when it is probable that an outflow of resources will be required to settle the obligation, and when a reliable estimate of the amount can be made. Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate. Where the effect of the time value of money is material, the amount of provision is the present value of the expenditure expected to be required to settle the obligation.

# q) Cash Flow Statements

The Group and the Company adopt the direct method in the preparation of the cash flow statements.

Cash equivalents are short-term, highly liquid investments with maturities of three months or less from the date of acquisition and are readily convertible to cash with insignificant risk of change in value.

The Group has excluded amount held in trust of The Sun Tsunami Fund from its cash and cash equivalents.

# r) Equity instruments

Ordinary shares are classified as equity. Dividends on ordinary shares are recognised in equity in the period in which they are approved for payment.

ICPS which are non-cumulative in respect of dividend and convertible into ordinary shares at predetermined conversion rate within stipulated period, are classified as equity.

The transaction costs of an equity transaction are accounted for as a deduction from equity, net of tax. Equity transaction costs comprise only those incremental external costs directly attributable to the equity transaction which would otherwise have been avoided.

# 4 CRITICAL ACCOUNTING JUDGEMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Group's accounting policies, which are described in Note 3, the directors are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

# (i) Critical judgements in applying the Group's accounting policies

In the process of applying the Group's accounting policies, which are described in Note 3 above, management is of the opinion that there are no instances of application of judgement which are expected to have a significant effect on the amounts recognised in the financial statements.

# (ii) Key sources of estimation uncertainty

Management believes that there are no key assumptions made concerning the future, and other key sources of estimation uncertainty at the balance sheet date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year except for the assumptions and estimation made in relation to the review of impairment of publishing rights as mentioned in Note 14.

Publishing rights acquired in a business combination is allocated to the cash generating unit ("CGU") that is expected to benefit from the business combination.

The Group tests the publishing rights for impairment annually or more frequently if there are indications that publishing rights might be impaired.

# Key assumptions used in value-in-use ("VIU") calculations

The recoverable amounts of the CGU is determined based on VIU calculations. VIU is calculated based on financial budgets covering 5 year period. The following describes each key assumption on which management has based its cash flow projections for VIU calculations:

#### (i) Budgeted gross margin

The basis used to determine the value assigned to the budgeted gross margins is the average gross margins achieved in the year immediately before the budgeted year adjusted for expected efficiency improvements, market and economic conditions and internal resource efficiency, where applicable.

## (ii) Growth rate

The weighted average growth rate of 4.4% used is consistent with the long-term average growth rates for similar industries.

## (iii) Discount rate

The discount rate used for identified CGU are on a basis that reflect specific risks relating to the CGU. The significant discount rate, applied to cash flows is 12%.

# Sensitivity to changes in assumptions

With regard to the assessment of value-in-use of the CGU, management believes that no reasonably possible change in any of the above key assumptions would cause the carrying values of the unit to materially exceed their recoverable amounts.

# 15 INVESTMENT IN SUBSIDIARY COMPANIES
